Professional Summary

Final-year Computer Science Engineering student with a strong interest in software development and building real-world projects. Seeking a Software Developer internship or entry-level opportunity to apply my technical skills, contribute to innovative projects, and continuously enhance my programming and problem-solving abilities.

Education

Swarnandhra College of Engineering and Technology, Seetharampuram

CGPA: 8.26 / 10.00*

B.Tech in Computer Science and Engineering

2023 – 2027

Aditya Junior College, Palakollu

Percentage: 93.5%

Senior Secondary (Intermediate)

2021 – 2023

Experience

AI for Sustainability Intern — 1M1B

May 2026 - June 2026

AI Waste Reduction Assistant: AI-Powered Waste Classification and Disposal Recommendation System

- Built an AI-powered waste classification system using Python and Streamlit to identify waste categories and recommend appropriate disposal methods.
- Integrated machine learning techniques to improve waste segregation accuracy and support environmentally sustainable waste management practices.
- Built an interactive AI-powered prototype that enables users to classify waste and receive real-time sustainable disposal recommendations through a simple user interface.

Projects

SCET Connect – College Student Portal

GitHub

Tech Stack: React.js, JavaScript, HTML, CSS, Vercel

- Developed SCET Connect, a responsive college student portal using React.js, JavaScript, HTML and CSS, featuring student login, branch/section selection and daily class schedules
- Deployed the application on Vercel with college branding and an interactive student-focused portal interface.
- Added college information, branding, and student-focused services to create a practical campus portal.

CodeBuddy – AI powered Coding Assistant

GitHub

Tech Stack: Python, Streamlit, Mistral AI, Google Colab

- Developed an AI-powered coding assistant using Python, Streamlit, and Mistral AI to generate code, explain programming concepts, and assist users in solving coding problems.
- Integrated AI-driven features for code debugging, optimization, and code explanation, providing accurate and interactive programming assistance.
- Built a user-friendly interface with Streamlit, enabling users to interact with the assistant in real time and improve coding productivity.

AI Waste Reduction Assistant — AI-based Waste Management System

GitHub

Tech Stack: Python, Streamlit, AI

- Developed an AI-powered system to classify waste and recommend suitable disposal methods using Python and AI.
- Built an interactive Streamlit interface for real-time waste classification and sustainable disposal recommendations.
- Implemented AI-based recommendations to improve waste segregation and encourage environmentally sustainable disposal practices.

Technical Skills

Programming Language: Python , Java (basic)

CS Fundamentals: Object-Oriented Programming (OOP), Basic SQL, Linux Basics

Web Development: Html,CSS,JavaScript(basic),Streamlit,Supabase

Tools & Platforms: Git, GitHub, Vs Code, Canva,Vercel

Soft Skills: Project Management,adaptability,Team Collaboration

Achievements

- **National-Level Hackathon Participant:** Participated in VISIONX, collaborating with a team to develop an innovative software solution under strict time constraints.
- **Project Expo Participant:** Presented software projects at SAMAGRA-2K26 (SRKR Engineering College) and ABHYUDAYA-2K25 (Swarnandhra College of Engineering and Technology).
